Subject: Energy Code Technical Advisory Group proposal for energy code update

External Email

I am writing in support of the Technical Advisory Group's proposed amendments to the statewide energy code. TCAT is working with the four largest jurisdictions in our county to drastically reduce our community-wide greenhouse gas emissions, with 2030 and 2050 targets all four jurisdictions have adopted. The proposed heat pump requirements will be a big help to our communities in achieving our targets. They will also save our residents money.

I urge the Council to approve these proposed changes.

Thank you.

Tom
